**ABOUT ME**

Congratulations! My name is Andrii. Let me introduce myself.

I was born in Lviv, but at the age of 30 I decided to move to the Czech Republic. I have always liked this country. It is also close to me in culture and architecture. I have been living here for two years and everything suits me. There are much better prospects and a more comfortable way of life for me. For two years of living in this country, I understand the Czech language. I like to communicate with people and continue to learn this language.

I'm sociable and punctual, I constantly set new goals and always try to meet deadlines. I like to play tennis, and especially to travel and ski. I often visit festivals and various interesting events.

I want to offer you my survey.I have long been interested in creating web pages. I wanted to do that. At first I tried it myself, then decided that I needed to take courses to get new information and knowledge in this industry. One month ago I graduated from the Yandex Practicum Frond-end Developer course. I want to further develop and continue to improve my skills and learn something new. Now I started learning the framework Vue JS.

I want to find an interesting team with interesting projects where I can get support in my work and learn a lot. In turn, I promise to give good results and help the team at the right time.
